

HookED Hexagon Template

Instructions for use

Ask students to:

- **brainstorm** everything they know about a given topic (presented as a focus question), and record each idea or thought on a separate blank hexagon.
- **make** connections between individual hexagons by looking for reasons to make straight edge connections (tessellating the hexagons). Students should explain orally or by annotation why they have made the connection.
- **explore** the node where three hexagons share a corner (or simply look at a cluster of hexagons) and make a generalisation about the nature of the connected ideas.

Add content to hexagons using the HookED Hexagon Generator at <http://pamhook.com/solo-apps/hexagon-generator/> or use the attached template by printing or displaying on an interactive whiteboard.

HookED Hexagon Template

One idea: complete a single hexagon.
Loose ideas: complete several separate hexagons.
Related ideas: complete connected hexagons; explain the cause for connecting two edges.
Extended ideas: complete tessellated hexagons; generalise about the connections at the vertex where three hexagons meet.
